2.4.5	Success Response (201 Created)	5

1 General Information

1.1 Base Path

All endpoints are available under the base path:

`/api/v1/auth/`

1.2 Available Endpoints

- POST `/login`
 - POST `/logout`
 - POST `/refresh`
 - POST `/register`
-

2 Endpoint Descriptions

2.1 POST `/login`

User authentication and token retrieval.

2.1.1 Request Body

```
{
  "username": "my-username",
  "password": "my-password"
}
```

Listing 1: Request Example

2.1.2 DTO Validation Errors

"username" - Username cannot be blank.

"password" - Password cannot be blank.

2.1.3 Validation Error Response (400 Bad Request)

```
{
  "status": 400,
  "message": "password: Password cannot be blank",
  "path": "/api/v1/auth/login",
  "timestamp": "2025-10-18T13:38:03.609116Z"
}
```

Listing 2: Example Response 400

2.1.4 Bad Credentials Response (401 Unauthorized)

```
{
  "status": 401,
  "message": "Invalid username or password",
  "path": "/api/v1/auth/login",
}
```

```
{
  "timestamp": "2025-10-18T13:25:55.011691500Z"
}
```

Listing 3: Example Response 401

2.1.5 Success Response (200 OK)

```
{
  "accessToken":
  "eyJraWQiOiJrZXktMSIsImFsZyI6ImlJTMjU2In0.eyJpc3MiOiJodHRwOi8vbG9jYWxob3N0OjgwODAw",
  "refreshToken": "nsE63Hd0TBxCtFtpFhxiqT4nIKE4UruHt8KsZjDetuw"
}
```

Listing 4: Example Response 200

2.2 POST /refresh

Refresh the token pair using a refresh token.

2.2.1 Request Body

```
{
  "token": "nsE63Hd0TBxCtFtpFhxiqT4nIKE4UruHt8KsZjDetuw"
}
```

Listing 5: Request Example

2.2.2 DTO Validation Errors

"token" - Token cannot be blank.

"token" - Token must be between 43 and 44 characters long.

2.2.3 Validation Error Response (400 Bad Request)

```
{
  "status": 400,
  "message": "token: Token must be between 43 and 44 characters long",
  "path": "/api/v1/auth/refresh",
  "timestamp": "2025-10-18T13:35:09.325266Z"
}
```

Listing 6: Example Response 400

2.2.4 Invalid Token Response (401 Unauthorized)

```
{
  "status": 401,
  "message": "Invalid refresh token",
  "path": "/api/v1/auth/refresh",
  "timestamp": "2025-10-18T13:30:47.880621100Z"
}
```

Listing 7: Example Response 401

2.2.5 Success Response (200 OK)

```
{
  "accessToken":
  "eyJraWQiOiJrZXktMSIsImFsZyI6ImlJTMjU2In0.eyJpc3MiOiJodHRwOi8vbG9jYWxob3N0OjgwODAw",
  "refreshToken": "nsE63Hd0TBxCtFtpFhxiqT4nIKE4UruHt8KsZjDetuw"
}
```

Listing 8: Example Response 200

2.3 POST /logout

Log out and invalidate the refresh token.

2.3.1 Request Body

Uses the same DTO as /refresh.

```
{
  "token": "nsE63Hd0TBxCtFtpFhxiqT4nIKE4UruHt8KsZjDetuw"
}
```

Listing 9: Request Example

2.3.2 Invalid Token Response (401 Unauthorized)

```
{
  "status": 401,
  "message": "Invalid refresh token",
  "path": "/api/v1/auth/refresh",
  "timestamp": "2025-10-18T13:30:47.880621100Z"
}
```

Listing 10: Example Response 401

2.3.3 DTO Validation Errors

"token" - Token cannot be blank.

"token" - Token must be between 43 and 44 characters long.

2.3.4 Success Response (204 No Content)

On successful logout, the server returns an empty response with 204 No Content status.

2.4 POST /register

Register a new user.

2.4.1 Request Body

```
{
  "username": "my-username",
  "password": "my-password",
  "email": "my-email@email.com"
}
```

```
}
```

Listing 11: Request Example

2.4.2 DTO Validation Errors

"username" - Username cannot be blank.

"username" - Username must be between 4 and 32 characters long.

"password" - Password cannot be blank.

"password" - Password must be between 6 and 32 characters long.

"email" - Email cannot be blank.

"email" - Email must be correct.

"email" - Email must be less than 32 characters long.

2.4.3 Validation Error Response (400 Bad Request)

```
{
  "status": 400,
  "message": "password: Password must be between 6 and 32 characters
long",
  "path": "/api/v1/auth/register",
  "timestamp": "2025-10-18T13:39:43.716760600Z"
}
```

Listing 12: Example Response 400

2.4.4 Conflict Response (409 Conflict)

Returned if a user with the given `username` or `email` already exists.

```
{
  "status": 409,
  "message": "A user with the given username or email already
exists",
  "path": "/api/v1/auth/register",
  "timestamp": "2025-10-18T13:34:07.353101200Z"
}
```

Listing 13: Example Response 409

2.4.5 Success Response (201 Created)

```
{
  "id": 1,
  "username": "my-username",
  "email": "my-email@email.com"
}
```

Listing 14: Example Response 201
